Office Action Summary

Art Unit: 2818

1. The following action is in response to the amendment filed by Applicants on June 5, 2000.
2. The Information Disclosure Statement submitted by Applicants on June 5, 2000 has been received and fully considered.
3. The Terminal Disclaimer filed by Applicants on June 5, 2000 has been received.
4. New claims 176-177 have been entered.
5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 151-153, 156, 159-163, 166-167, 171-172 and 174-175 are rejected under 35 U.S.C. 102(b) as being anticipated by Laid-open Patent Application No. 60-55459 (hereinafter JP '459)..

JP '459 disclosed in figure 4 a block data transfer method and storage control method in which the number of words to be transferred is provided to the memory control device [2] via bus [7] (page 5, lines 11-13) and then in response to a write request (page 3, line 22), the data block is written to the destination memory area.

It is inherent that the data is in binary form, and the memory device disclosed by JP '459 is operated in synchronous with clock signal.
